## (X)HTML tags – excerpted from www.w3schools.com

Tag	Description
	Defines a comment
	Defines the document type
<u><a></a></u>	Defines an anchor
<abbr></abbr>	Defines an abbreviation
<acronym></acronym>	Defines an acronym
<address></address>	Defines an address element
<area/>	Defines an area inside an image map
<u><b></b></u>	Defines bold text
<base/>	Defines a base URL for all the links in a page
<u><bdo></bdo></u>	Defines the direction of text display
<u><big></big></u>	Defines big text
 <u>  dockquote&gt;</u>	Defines a long quotation
<body></body>	Defines the body element
<u> </u>	Inserts a single line break
<but></but>	Defines a push button
<caption></caption>	Defines a table caption
<cite></cite>	Defines a citation
<code></code>	Defines computer code text
<col/>	Defines attributes for table columns
<colgroup></colgroup>	Defines groups of table columns
<u><dd></dd></u>	Defines a definition description
<del></del>	Defines deleted text
<div></div>	Defines a section in a document
<dfn></dfn>	Defines a definition term
<u><dl></dl></u>	Defines a definition list
<u><dt></dt></u>	Defines a definition term
<u><em></em></u>	Defines emphasized text
<fieldset></fieldset>	Defines a fieldset
<form></form>	Defines a form
<frame/>	Defines a sub window (a frame)
<frameset></frameset>	Defines a set of frames
<h1> to <h6></h6></h1>	Defines header 1 to header 6
<head></head>	Defines information about the document
<u><hr/></u>	Defines a horizontal rule
<html></html>	Defines an html document
<u><i>&gt;</i></u>	Defines italic text
<u><iframe></iframe></u>	Defines an inline sub window (frame)
<img/>	Defines an image
<u><input/></u>	Defines an input field
<ins></ins>	Defines inserted text

≤label>         Defines a label for a form control           ≤legend>         Defines a title in a fieldset           ≼li>         Defines a list item           ≼link>         Defines a resource reference           ≼map>         Defines an image map           ≼meta>         Defines meta information           ≼noscript>         Defines a noframe section           ≼noscript>         Defines a noscript section           ≼object>         Defines a moscript section           ≼object>         Defines a noscript section           ≼object>         Defines a mother of list           ≼option>         Defines an ordered list           ≼option>         Defines a paragraph           ≼param>         Defines a paragraph           ≼param>         Defines a parameter for an object           ≼pre>         Defines a parameter for an object           ≼gp         Defines a swint quotation           ≼samp>         Defines sample computer code           ≼script>         Defines a section list           ≼smal>         Defines a section in a document           ≼st	<kbd></kbd>	Defines keyboard text
Sil>   Defines a list item		
Sink≥   Defines a resource reference		Defines a title in a fieldset
<map>       Defines an image map         <meta/>       Defines meta information         <noscript>       Defines a noscript section         <object>       Defines an embedded object         <ol>       Defines an ordered list         <optgroup>       Defines an option group         <optgroup>       Defines an option in a drop-down list          Defines a paragraph         <param/>       Defines a parameter for an object         <pre>       Defines preformatted text         <q2< th="">       Defines a short quotation         <samp>       Defines sample computer code         <script>
